FlatscreenEnclosure

092.0900 FlatscreenEnclosure for flat screens 36 - 37 inch

A customer may use a flat screen enclosure to protect their valuable monitor against its environment or to integrate the Digital Signage products within their shop concept. Furthermore an enclosure will make sure the cabling will be nicely concealed and the monitor brand is not visible. For this solution, both the front- and back plate are removable for service or maintenance. The back side of the enclosure is flat, of which the top and bottom are fitted with ventilation holes. Within the housing we have reserved space for a PC or mediaplayer.
